No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1982 articles are the same as those shown for current articles.

MADE IN THE UNITED STATES OF AMERICA

CONTENTS OF VOLUME 219

NUMBER 1, NOVEMBER 1982

BIOCHEMISTRY OF VIRUSES AND NUCLEIC ACIDS

- Purification and Properties of Two Ribonuclease H Enzymes from Yeast
E. Cheriathundam and Lucy M. S. Chang 110

BIOLOGICAL OXIDATION AND BIOENERGETICS

- Creatine Kinase of Heart Mitochondria: Changes in Its Kinetic Properties Induced by Coupling to Oxidative Phosphorylation
William E. Jacobus and Valdur A. Saks 167

COENZYMES

- Properties of the Selenium-Containing Moiety of Nicotinic Acid Hydroxylase from *Clostridium barkeri*
Gregory L. Dilworth 30

ENZYME MECHANISMS AND METABOLISM

- Kinetic Properties, Solubilization, and Molecular Characterization of *Mucor rouxii* Adenylate Cyclase
María Leonor Cantore and Susana Passeron 1
- Nitrate Reductase from *Penicillium chrysogenum*: The Reduced Flavin-adenine Dinucleotide-Dependent Reaction
Franco Renosto, Norman D. Schmidt, and Irwin H. Segel 12
- Evidence for Distinguishable Sites of Attack in the Reactions of 5'-*p*-Fluorosulfonylbenzoyl Adenosine and 5'-*p*-Fluorosulfonylbenzoyl Guanosine with Rabbit Muscle Pyruvate Kinase
Anjanayaki E. Annamalai, John M. Tomich, Maria T. Mas, and Roberta F. Colman 47
- Isolation and Characterization of an Intracellular Serine Protease from *Rhodococcus erythropolis*
John D. Shannon, Judith S. Bond, and S. Gaylen Bradley 80
- Buffer-Dependent Variations in Assay of Tyrosine Aminotransferase Holoenzyme
Robert D. Reynolds 140
- Effect of Adenosylhomocysteine and Other Analog Thioethers on a Prokaryotic tRNA (Guanine-7)-methyltransferase
Giovanni Paoella, Gennaro Ciliberto, Cinzia Traboni, Filiberto Cimino, and Francesco Salvatore 149
- pH-Dependent Oxygen Exchange of Phosphate and Hydrolysis (of Sulfur) from Thiophosphate Catalyzed by Acid Phosphatases
Robert L. Van Etten and Mohan S. Saini 155
- Ornithine Synthesis from Glutamate in Rat Small Intestinal Mucosa
Jerry G. Henslee and Mary Ellen Jones 186

LIPIDS

- Changes in Phospholipid Composition during the Development of *Dictyostelium discoideum*
Akira Hase 21

MEMBRANE STRUCTURE AND FUNCTION

- Polyphosphoinositide Synthesis in Rabbit Erythrocyte Membranes
Eugene E. Quist 58
- Ca²⁺-Dependent and Ca²⁺-Independent Mechanisms for Phosphatidylinositol Hydrolysis and ³²P-Labeling during Cholinergic Stimulation of the Rat Submaxillary Gland *in Vitro*
Robert V. Farese, Ronald E. Larson, and Mohammad A. Sabir 204

PHOTOSYNTHESIS AND PLANT BIOCHEMISTRY

- Purification and Properties of Soybean Nodule Xanthine Dehydrogenase
Eric W. Triplett, Dale G. Blevins, and Douglas D. Randall 39
- Multiple Forms of Chlorophyll-Protein Complexes from a Thermophilic Cyanobacterium *Synechococcus* sp.
Yuichiro Takahashi, Hiroyuki Koike, and Sakae Katoh 209
- Functional Subunit Structure of Photosystem 1 Reaction Center in *Synechococcus* sp.
Yuichiro Takahashi and Sakae Katoh 219

PHYSICAL BIOCHEMISTRY AND PHYSICAL CHEMISTRY OF MACROMOLECULES

- Estimation of Sedimentation Coefficients of Globular Proteins: An Application of Small-Angle X-Ray Scattering
Thomas F. Kumosinski and Helmut Pessen 89

POLYSACCHARIDES AND COMPLEX CARBOHYDRATES

- Carbohydrate Heterogeneity of Vesicular Stomatitis Virus G Glycoprotein Allows Localization of the Defect in a Glycosylation Mutant of CHO Cells
Pamela Stanley 128

PROTEIN STRUCTURE, FUNCTION, AND TURNOVER

- Separation and Characterization of Oat Globulin Polypeptides
A. Chris Brinegar and David M. Peterson 71
- Modification of *Serratia marcescens* Anthranilate Synthase with Pyridoxal 5'-Phosphate
Stanley Bower and Howard Zalkin 121
- Structure of Yeast RNA Polymerases Determined by Electron Microscopy
Paulina Bull and Jorge Garrido 163

REGULATION OF METABOLISM AND OF ENZYME ACTION

- Derepression of Asparaginase II during Exponential Growth of *Saccharomyces cerevisiae* on Ammonium Ion
Robert J. Roon, Moira Murdoch, Barbara Kunze, and Patricia C. Dunlop 101
- Stimulation of Liver Glycogen Particle Synthase D Phosphatase Activity by Caffeine, AMP, and Glucose 6-Phosphate
Daniel P. Gilboe and Frank Q. Nuttall 179
- Dephosphorylation of Skeletal Muscle Phosphorylase, Glycogen Synthase, and Phosphorylase Kinase β -Subunit by a Mn²⁺-Activated Protein Phosphatase
David L. Brautigan, Balwant S. Khatra, Thomas R. Soderling, and Edmond H. Fischer 228
- Chicken Liver Dihydrofolate Reductase: Activation and Alteration of Enzymatic Properties as a Result of Reaction with Methylmercury
Elizabeth K. Barbehenn and Bernard T. Kaufman 236

STRUCTURAL PROTEINS

- Differential Proteolytic Susceptibility of Laminin Alpha and Beta Subunits
*C. N. Rao, I. M. K. Margulies, R. H. Goldfarb, J. A. Madri,
 D. T. Woodley, and L. A. Liotta* 65
- Synthesis and Physical Properties of (Hydroxyproline-Proline-Glycine)₁₀: Hydroxyproline in the X-Position Decreases the Melting Temperature of the Collagen Triple Helix
*Katsuhiko Inouye, Yuji Kobayashi, Yoshimasa Kyogoku, Yasuo Kishida,
 Shumpei Sakakibara, and Darwin J. Prockop* 198

NUMBER 2, DECEMBER 1982

COMMUNICATIONS

- N-Acetyl Conjugates of Basic Amino Acids Newly Identified in Rat Urine
Kei Sasaoka, Tadashi Ogawa, and Masumi Kimoto 454
- Calcium-Activated Factors in Pancreatic Islets That Inhibit Actin Polymerization
Michael J. MacDonald and Anjaneyulu Kowluru 459

BIOCHEMICAL GENETICS AND CELLULAR DIFFERENTIATION AND DEVELOPMENT

- Protein Synthesis and Degradation in Cultured Muscle Is Altered by a Phorbol Diester Tumor Promoter
Christopher M. West and Howard Holtzer 335

BIOCHEMISTRY OF VIRUSES AND NUCLEIC ACIDS

- Influence of High-Mobility-Group Nonhistone Chromosomal Proteins 1 and 2 on the Digestion of Chromatin with Micrococcal Nuclease
Lyuben N. Marekov and Beltcho G. Beltchev 261
- Regulation of Rous Sarcoma Virus RNA-Dependent DNA Polymerase Isoenzymes by *in Vitro* Phosphorylation-Dephosphorylation
Amnon Hizi 394
- Proton Magnetic Resonance Analysis of Terbium Ion-Nucleic Acid Complexes: Further Evidence for Two-Site Binding to Polynucleotides
David S. Gross, Henry Simpkins, Edward Bubienko, and Philip N. Borer 401

COENZYMES

- The Regulation of One-Carbon Oxidation in the Rat by Nitrous Oxide and Methionine
J. T. Eells, K. A. Black, A. B. Makar, C. E. Tedford, and T. R. Tephly 316

ENZYME MECHANISMS AND METABOLISM

- Purification of Cytosolic, Latent Endoribonuclease from Porcine Thyroid
Elizabeth E. Button, Ronnie Guggenheimer, and Fredrick J. Kull 249
- Zn²⁺, Mg²⁺, and H⁺ Binding to D-Fructose 1,6-Bisphosphate Studied by ³¹P and ¹H NMR
Gerard B. Van den Berg and Arend Heerschap 268
- Hysteretic Behavior of Rat Liver Fructose 1,6-Bisphosphatase Induced by Zinc Ions
Hedwig Vaandrager-Verduin, Theo J. C. Van Berkel, and Johan F. Koster 277
- Purification and Properties of Two Different α 1-Protease Inhibitors from Mouse Plasma
S. Nathoo, A. Rasums, J. Katz, W. S. Ferguson, and T. H. Finlay 306
- Active-Site Modification of Glycerol-3-Phosphate Dehydrogenase by Pyridoxal-5'-Phosphate
Robert E. Smith, Michael W. Hsieh, and Ron MacQuarrie 351

HORMONE STRUCTURE AND FUNCTION

- Cell-Free Translation Analysis of the Vitamin D-Dependent Calcium Binding Protein mRNA Activity Present in Total RNA and Polysomal Extracts from Chick Intestine *Paul Siebert, Willi Hunziker, and Anthony W. Norman* 286

MEMBRANE STRUCTURE AND FUNCTION

- Comparison of Detergent-Solubilized and Membrane-Bound Forms of Kidney (Na + K)-ATPase *Marcia Steinberg and Joseph J. De George* 359
- Selective Solubilization and Purification of Cell-Surface Concanavalin A-Binding Glycoproteins from Novikoff Hepatocellular Carcinoma Cells
Toshiaki Shinohara, Michael W. Thomas, Ellen G. Gilliam, Virginia P. Wray, and Earl F. Walborg, Jr. 411
- A High-Affinity Calcium-Stimulated ATPase Activity in the Hen Oviduct Shell Gland *William A. Coty and Charles L. McConkey, Jr.* 444

OXYGENASES, MICROSOMES, AND P-450 REACTIONS

- γ -Butyrobetaine Hydroxylase: A Unique Protective Effect of Catalase
John S. Blanchard, Sasha Englard, and Atsushi Kondo 327

PHOTOSYNTHESIS AND PLANT BIOCHEMISTRY

- Regulation of P_i Uptake by *Acer pseudoplatanus* Cells
Fabrice Rebeille, Richard Bligny, and Roland Douce 371
- Capacity of the Malate/Oxaloacetate Shuttle for Transfer of Reducing Equivalents across the Envelope of Leaf Chloroplasts *Christoph Giersch* 379
- Purification and Sequencing of Cyanogen Bromide Fragments from Ribulosebisphosphate Carboxylase/Oxygenase from *Rhodospirillum rubrum*
Fred C. Hartman, Claude D. Stringer, John Omnaas, Mark I. Donnelly, and Bassam Fraij 422

PROTEIN STRUCTURE, FUNCTION, AND TURNOVER

- NADH:(Acceptor) Oxidoreductase from Bovine Adrenal Medulla Chromaffin Granules *Sam Zaremba and Ruth Hogue-Angeletti* 297
- Photoaffinity Labeling of a Microtubule-Associated Cyclic AMP-Binding Protein
David Soifer, Kathryn Mack, and Donald A. Chambers 388

REGULATION OF METABOLISM AND OF ENZYME ACTION

- In Situ* Inactivation of *E. coli* Uridylylation Cycle Is Independent of the State of Covalent Modification of the Components of the Glutamine Synthetase Cascade
Umberto Mura, Monica Ceccherelli, and Stefania Gini 366
- Interaction between Polyamines and Nucleic Acids or Phospholipids
Kazuei Igarashi, Izumi Sakamoto, Nobuko Goto, Keiko Kashiwagi, Reiko Honma, and Seiyu Hirose 438
- AUTHOR INDEX FOR VOLUME 219 463
- CUMULATIVE SUBJECT INDEX FOR VOLUMES 213-219 465

Instructions to Authors¹

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. Manuscripts are welcome that contain new and significant information of general interest to workers in these fields. Sufficient detail must be included to enable others to repeat the work.

Manuscripts should be written in clear, concise and grammatical English and should be submitted in triplicate (one original and two photocopies), including three sets of figures, to:

Archives of Biochemistry and Biophysics
Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Failure to receive the required number of copies of the manuscript may delay review. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. Contributors will receive decision letters from the Executive Editor. Resubmitted manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Communications offer a means of early publication of work of such importance that rapid release is warranted. Normally they should not exceed 15 manuscript pages in length (including text, bibliography, tables, and figures). The review and printing of such papers will be expedited to provide earliest possible publication.

Form of Manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted. See the back cover for the listing of the Subject Areas.

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name and complete mailing address (and telephone number if possible) of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet; footnotes to tables should be identified by superscript lowercase italic letters (*^{a,b}*, etc.) and placed at the bottom of the table.

¹ An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC-IUB rules and recommendations, and accepted abbreviations.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. Line drawings should be professionally drafted and no larger than 8.5 × 11 in. Letters and numbers should be at least $\frac{3}{16}$ in. (4 mm) in height (Leroy lettering size 200). Glossy prints of figures properly prepared are acceptable.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1969. Please note the following examples.

1. JONES, J. B., DILWORTH, G. L., AND STADTMAN, T. C. (1979) *Arch. Biochem. Biophys.* **195**, 255-260.
2. METZLER, D. E. (1977) *Biochemistry: The Chemical Reaction of Living Cells*, p. 298, Academic Press, New York.
3. HARRINGTON, W. F. (1979) in *The Proteins* (Neurath, H., and Hill, R. L., eds.), Vol. 4, pp. 246-409, Academic Press, New York.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.
